veterinaryvision.co.uk

A dedicated ophthalmology referral service

New facilities and equipment

A purpose designed referral-only ophthalmology clinic with state-of-the-art facilities for all types of extraocular and intraocular surgery.

Rapid feedback on diagnosis and treatment

Our team of ophthalmologists will work with you to provide your client with the optimum treatment available. We pride ourselves on accurate rapid communication and a written report will be provided for all cases clearly outlining our clinical findings, diagnosis and treatment plan.

Outstanding clinical care

We have produced online factsheets covering a variety of common ocular conditions. These PDF documents are print-ready for vets and clients to use and are available on veterinaryvision.co.uk/factsheets

Why refer to us?

Veterinary Vision offers a dedicated ophthalmology referral service for cases referred throughout the UK. We are equipped with specialised diagnostic equipment and state-of-the-art operating facilities within purpose designed ophthalmology practices, to provide your client with the optimum treatment available.

Our team of ophthalmologists routinely perform complex extraocular and intraocular microsurgical procedures, and they are supported by a team of registered veterinary nurses to ensure that all our patients receive the best treatment possible - it's at the heart of everything we do.

Case Advice
